

# **MANIFESTO**

AMITANSHU GUPTA

11082

DUGC STUDENT NOMINEE, MTH

## **MOTIVATION:**

Our department provides many opportunities and resources to the students and I'm grateful to be part of it. Unlike other departments, students of Mathematics and Statistics have an opportunity to indulge in diverse fields owing to the widespread application of mathematics and computer science in our day to day lives and I shall try to further enhance it through the medium of this post.

## **MISSION AND VISION:**

- **UGP's.**

There has been a lot of hassle in choosing and getting UGP's. Currently, a student has to select a project topic in his/her area of interest and then approach the concerned faculty member but, as we generally have limited interaction with faculties (generally course instructors of previous semesters), the options are very limited and it's generally observed that without having an insight of the project we are going to take, we take it for the sake of doing a UGP. For this, I would try to have a common list of the projects and the pre-requisites for the same to be available to all the concerned students.

- **Courses on Finance, Computing and Management.**

There is an acute shortage of courses which are offered to us in the above-mentioned fields and I personally think that most of the department students are interested to pursue a career in these fields. So, I would strive for making some of the courses in the above fields available to the students of our department and I will try to establish a link between the departments offering the courses and our department.

- **Grading Statistics.**

I would try to request that the grading policy and grade statistics are distributed via email to the students by the respective course instructors.

- **Termination Issues.**

In most of the termination cases, the student does not get a proper guidance for mercy plea, I would try to ensure that the concerned student gets to know about all the procedures of appealing for mercy.

### **Credentials:**

- Secretary, Informal Cell, Antaragni'12.
- Hall Executive Committee Member'12-13, Hall 10.
- Selected for Summer Internship program offered by the Indian Academy of Sciences.
