Contesting for the post of **Senator UG Y14** in general elections 2016

## **Mission:**

As a senator of UG Y14 and an elected representative of the student body, I feel that working system in our campus and the overall environment seeks many changes. Being a senator before and having seen its working closely, I would like to bring about the following changes:

### **1. Take actions over the issues of Health Center**

If the complaints keep increasing with such exponential rate, in no time I bet students will no longer this facility as a facility. Although this issue has been discussed in senate, I will ensure that the work is in progress and even dilute those problems which may not have been touched by the student senate.

### **2. Publicising Senate activities through social media**

One of the most important part of democracy is to have opinions over the actions taken by the administration. This is possible only if the laws, resolutions, rules and regulations are properly publicised so as to see that the students whose these laws are for are happy/content or not.

### **3. Check should be done on the prices of items in Shopping**

**Center and it should not be greater than that of outside**

### **4. Promotion of new initiatives such as hobby groups as per your own interest**

**Vision:**

As a Senator of UG Y14, my primary aim would be to represent the opinion of the student body of Y14 in the senate. I foresee an environment where students see their opinions, wishes fulfilled and that they are provided with all the basic amenities at the institute level.

**Credentials:**

1. **President Hall V**, term 2015-16
2. **UG Y14 senator** for the term 2014-15.
3. Hospitality secretary at Antaragni'15.
