

# MANIFESTO

MUGDHA ARORA (150427)

Contesting for the post of BT/BS 1st Year Senator Student Senate

Proposed By: Aakanksha (150002)

Seconded By:

1. Faizal Ansari (150244)
2. Abhimanyu Gupta (150014)

**Vision:** To ensure ethical and efficient working in the campus aiming towards betterment, growth and development of the student community as a whole.

**Mission:**

➤ **Converting IIT Kanpur into a polythene free zone.**

The use of polythene is an environmentally irresponsible practice. I plan to propose a ban on polythene use in all shops, whether big or small, as well as in public life, and using cloth or jute bags instead. The ban may be implemented taking help from SIS guards who are on guard in the campus 24 hours.

➤ **Ensuring Departmental Activities in the First Year**

We, the first yearites, have very little or no approach to the professors of our respective departments and hence, have no insight of the department, which puts us in a situation where we stand with just hearsay about the departments creating apprehensions even before we begin the core course. Departmental activities and hence the contact with professors can do away with this state of being uninformed.

---

➤ Creating Smoking Zones

We have a substantial lot of people smoking openly in the campus creating health issues for themselves as well as the passive smokers. While everyone is responsible for one's own health, no one has the right to harm others. Smoking zones in various halls and public areas will uphold the government's ban on smoking in public areas put up in October, 2008.

---

➤ Ensuring proper infrastructure and better funding for projects of the clubs, once the proposal passed to accept private investments is brought into implementation, especially the Electronics club and Robotics club.

---

➤ Ensuring a less chaotic and smooth registration process by allotting different time slots to different roll numbers.

---

➤ Keeping in mind the large number of boys, the availability of coaches, and the lack of interest in various opted sports in PE101 and 102, proposing one amongst the following (as found feasible):

-> increasing the number of days on which a particular sport can be opted for in CPA, to accommodate a larger number of enthusiasts.

-> reserving a small fraction of seats for interested beginners in every sport.

---

➤ Looking into the issues with HC, so as to why the general body is a bit skeptic and at times unsatisfied with the facilities and treatment available.
