January 2016

## Vision

As a senator of Y14 I shall put forth the interests of the students of my batch and institute at large. I envisage that after the end of my period as a senator, IIT Kanpur would be a better place for the current students and the coming batch as well. I shall try relentlessly to implement the points mentioned in my manifesto and abide by them till the very end.

I am not just your representative but your friend and well wisher with a commitment to bring positive changes to the institute and my fellow batch mates. I will try my best to be approachable and would fight for your cause even against the strongest odds. I ensure that any grievance or complaint from the general body members will be addressed on the floor of the senate.

## Mission and Main Targets

1. Lecture hall booking for various gymkhana and related activities is a very tedious process. I will ensure the automation of this process is completed early in my tenure as a senator by coordinating with the portal developers.

2. Student search databases should be appended with data related to club coordinators, hobby group leaders and secretaries, to increase the ease of access of such information, and making it easy for students, especially in the junior batch to approach the concerned students.
3. Manually operated bells in Lecture Hall Complex should be replaced by electric bells as it will reduce manpower and make the process efficient. I will propose the same in the senate.
4. Injuries in sports are quite frequent, and the Games and Sports Council lacks equipments necessary for the same because of which proper remedy can't be given immediately. I will propose that gymkhana sanctions budget for it at the start of the year, so that necessary equipment is present in campus to combat the problem.
5. Many people in the campus wear spectacles, and no such shop is available in the Shopping Complex. I will raise this as an agenda in the senate so that the institute authorities get aware of this problem and do the needful.
