ON THE SHOULDERS OF GIANTS

Conscience

Pool Event, Points: 30

Problem Statement:

It will be a on-site hackathon of 12 hours. There will be a problem statement associated with Machine Learning and the pool must submit the solution to the problem on the given link for judging. If some part of the code is taken from an open source project, then it may be used with proper acknowledgement.

Rules and Regulations:

The allowed team size is 3 to 5 members. Each pool will be given an ID and the pool will be required to submit their solution with the given ID. There would be no penalty for wrong submissions. In case of cheating / communication outside your team / fraud / leaks, the concerned pools will be penalized.

Scoring system:

- The pool which gets highest accuracy-metric (whose algorithm performs the best on the test data) will win the points for the problem.
- The accuracy-metric used for measuring the algorithm's performance MAY be mentioned in the problem.
- In case two pools achieve the same accuracy then the one who makes the submission earlier will be ranked higher
