ON THE SHOULDERS OF GIANTS

# CODE-FEST

**Pool Event**

**Points: 30**

**Problem Statement:**

Participating pools will attempt to solve programming questions in a time-bound setting, which should be handle production environment.

**Rules and Regulations:**

- **Time:** 6 hours (tentatively)
- Each pool will be given a codename (login), which will be sent to the pool captains before the start of the event. Programming club won't know which pool is which.
- Any intent to disclose your pool's codename will result in disqualification.
- Any kind of unethical behaviour or plagiarism will be heavily penalised. See [code of ethics](#).

**Tasks:**

Teams are supposed to solve algorithmic problems. The code should take into account all cases which may happen in production. Good quality and readable code is expected. This event would require teamwork.

SCIENCE AND TECHNOLOGY COUNCIL

**TAKNEEK '18**

ON THE SHOULDERS OF GIANTS

**Scoring:**

Each question will be graded on the metric as would be mentioned in the problems.

With each submission, there is a time penalty associated for it.

The total time penalty is the sum of time penalties for each solved question.
