

Students' Senate (2016-17)
Indian Institute of Technology Kanpur

To consider a proposal to

Improve the Poor condition of Campus Maps

Proposed by: Richeek Awasthi , Senator BT/BS Y16

As a fresher , I along with many other students faced difficulty in finding their way around in the campus mainly due to the vast size of the campus with no road signs specifying the directions. The campus map installed near the Director's residence is of absolutely no use in finding way primarily because it is covered in rust and the has not been maintained in a long time . Even the map of academic area installed at the Gate no. 3 of academic area suffers the same fate.

The location of new buildings have not been updated in the map and the paint is barely visible.

Even though the digital copy of the campus map is available on the IITK site, we should realize that a person visiting the campus may not be aware about such facilities unless some information regarding to this is available at the IITK gate. We should realize that every person visiting the campus may not have access to a smart phone or a computer .

Having said that

Proposals

- The campus maps must be maintained and updated. It should be ensured that the maps are regularly maintained.
- People should be made aware about the campus map available online .

Students' Senate (2016-17)
Indian Institute of Technology Kanpur

- Posters with QR codes can be pasted at the IIT gate region. These QR codes when scanned will redirect the user to the campus map page.
- If possible , Road signs can be installed in various remote regions of the campus where WIFI facility isn't available .
