

Desired changes through DOAA:

- 1) A presentation on basic functionality of the oars and how to use the instructor's notes must be made available to all instructors upon login.
- 2) A course offering on OARS must include the following:
  - A dynamic indicator of the total number of students registered in the course and the number of seats left. (This would be best as the criterion is first-come-first-serve for many courses).
  - Corrected Pre-requisites (At present this feature is outdated for many courses)
  - Particular batches/departments to whom the course is not being offered (despite the pre-reqs) on Instructor's notes. If there is no such restriction, it must show offered to all students satisfying pre-reqs. In no case, should it be void.
  - No course should be accepted in the OARS without the above.
- 3) The DOAA is requested to send a reminder mail to the HODs of all departments, at least two weeks prior to the deadline for CCC report. Even the Students' Senate can make this a practise to send a mail to all HODs requesting them to oversee the working of the CCCs for better interests of the students.
