

Proposal to Change the structure of Gate / install convex mirrors in front of TA 202 Laboratory

Proposed by : Simrat Singh, Senator UG Y14

Seconded by : Nikhil Bansal, Senator UG Y14

The gate in front of TA 202 lab is one of the most frequently used entries into the Academic area, especially in the second half of the day, when most of the students have labs. The solid gates completely block the vision of both the incoming and outgoing traffic and it is a big accident risk. While coming out of the academic area through the gate, it is a blind turn and extremely dangerous.

Proposal :

I propose to change the structure of the gate to one which allows visibility through it, like the one installed at the entry to CC. If cost is a reason of concern, only one of the gates can be changed on an experimental basis as the view from the opposite side is already blocked by the SIS guard room.

I request the Senate to allow the use of pictures to supplement my proposal. They will permit me to convey my point of view more clearly.
