

AGENDA ITEM

Proposal for construction of a Rickshaw-Stand near the New SAC area for improving the transportation facility for students residing in that area.

Purpose - The institute campus sprawls over an area of 1100 acres in which the only transportation centre is the MT area. The lack of proper transportation causes a huge problem, in particular for the students residing in halls like Hall 7,8,9,10,11,SBRA etc. The students residing in Hall 2,5 etc are relatively in a better position to avail such facilities. The lack of even the simplest mode of transport is a matter of concern and needs immediate attention.

Details - I would like to mention certain points in regard to this proposal-

- The construction of a Rickshaw-Stand near the New SAC area should be accompanied by installation of a drinking-water facility for the ease of the Rickshaw drivers. I have talked to them and they will find the stand to be much more relevant in this case.
- It would be beneficial to take into account the already present cycle repair shop near Hall 7 as it would attract more Rickshaw drivers in that area.
- This has been a growing problem for all the residents of a huge area comprising of many halls and one finds it difficult to get a mode of transportation at any time.

Therefore, I propose this agenda item to be taken seriously and proper actions be started at the earliest.
