

DPGC Student Nominee (Department of Materials Science Programme)

- As a Ph.D. student first of all I will focus on the research work with the improvement of instrumentations in our department which are necessary for characterization and measurements.
- Secondly I will focus on individual problems of research student like tutorial, TAs works.
- Definitely if there is any problem between the understanding of a research scholar and his supervisor regarding any issue, I will be an active body for this matter and hope that we will reach on a conclusion which will be in agreement for everyone.
- I will be an active body for departmental office work which will be related to monthly fellowship, any departmental seminar, and research opportunity in abroad and any kind of facility.
- Time to time I will request for departmental meetings for innovative research and a kind of suggestion with students, Professors, HOD which will be beneficial to an individual student as well as for the institute also.

Thanks

Subhash Singh

Ph.D. Student

Materials Science Programme
