

MANIFESTO

For the post of
DPGC student representative
ABHIJEET SHUKLA
MASTER OF DESIGN

- I will invite students once in a month to discuss any problem or grievances and convey it to concern person or faculty to avoid any confusion of facts for decisions.
- I will suggest and help all interested students to get their chance for preferred TA duties and not overload of work on same person.
- Students with research proposals/project proposals and ideas will be highlighted and i'll try to arrange seminar sessions with our dear seniors and respected faculty members to upraise the ideas.
- I will try to arrange more lab facilities within the limitation of post along with components, instruments and equipments which are required in projects commonly so that transformation of ideas to products don't stop due to lack of above mentioned.

I believe that I can act as a strong link between students and the administration side; making sure that both receive appropriate aspects and full stories of each other while considering any decision.

THANK YOU

ABHIJEET
